Profile

I am a Full Stack Developer with a passion for technology and innovation seeking an opportunity to reenter a career in Software Engineering. I offer experience in full stack web application development from conception to delivery of performant and maintainable solutions using functional programming paradigms and test driven development in an Agile environment. My expertise range from designing and implementing responsive and user-friendly UX/UIs to scalable and fault-tolerant event-driven microservice infrastructures. In particular, I specialize in web application development using the React and Node.js ecosystems, as well as cloud native and container-based architectures using Docker and Kubernetes.

Skills

Languages:

JavaScript, Shell (Bash)

UX/UI and Front End Technologies:

Sketch, HTML, CSS, CSS Modules, PostCSS, React, Redux

DevOps Tools and Technologies:

Helm, Skaffold, CircleCI

Development and Testing Tools:

Git, Yarn, Lerna, Webpack, Babel, Jest, ESLint

Back End and Database Technologies:

Node.js, Express, GraphQL, MongoDB

Infrastructure Technologies:

Docker, Kubernetes, AWS, GCP

Work Experience

Alluminate - *Full Stack Blockchain Developer*

November 2017 - February 2018

- Provided high-level technology expertise and development capabilities for in-house and consulting work ranging from UX/UI to smart contract development.
- Designed, developed and maintained the company's homepage as well as the landing page for several products.
- Core development member of the CryptoPets platform, an Ethereum-based game platform for collecting and battling digital pets developed in partnership with Arcade Distillery.
- Aided in smart contract design, as well as audited smart contracts for correctness.
- Developed in-house development and testing environment using Web3, Docker and Geth.

Booz Allen Hamilton - *Technologist*

May 2017 - November 2017

- Developed proof of concept Blockchain applications based on Ethereum for various government organizations, including the U.S. Treasury and the FDA.
- Worked across the stack from UX/UI design to implementation of front end and back end logic in React and Node/Express respectively, as well as application deployment to various cloud providers including AWS and Azure in an Agile environment using Kanban.
- Acted as defacto Product Owner and Scrum Master when necessary to translate requirements from the stakeholder, and convert requirements into tasks to be distributed among team members.
- Participation, expertise and leadership in projects led to conversion of one project from a Proof of Concept work into a full-fledged proposal for a contract bid.

Capital One - *Senior Associate*

August 2016 - November 2016

- Developed and maintained Automobile Loans and Home Loans features in Capital One's flagship Android banking application using Scrum-based development methodologies.
-

Education

The University of Virginia: School of Engineering and Applied Science (SEAS)

August 2016

- Computer Engineering & Electrical Engineering
