## Profile

---

Staff Software Engineer with a passion for solving difficult technical problems, delivering delightful products that empower people and leading high performing engineering teams.. Expertise in full-stack web application and NPM package development in TypeScript, with a strong background in digital asset custody, web3, and accessibility. Proven track record of delivering performant, scalable, and secure software solutions in fast-paced, high-growth startup environments. Demonstrated leadership in guiding cross-functional teams, fostering collaboration, and effectively bridging the gap between technical, product and business stakeholders to achieve strategic goals.

---

## Work Experience

---

Ava Labs - *Staff Software Engineer*, Remote

February 2023 - Current

- Lead the engineering effort for a non-custodial cross-platform institutional custody solution to manage assets across Bitcoin, Ethereum Virtual Machine (EVM) chains, Avalanche & Solana that seamlessly integrate with centralized exchanges for off-chain settlements leveraging multi-party computation (MPC) & Trusted Execution Environments (TEEs).
- Collaborate cross-functionally with senior leadership, product, business, design and security teams to drive strategy & roadmap, engineering hiring, and technology & systems architecture decisions.
- Work with the internal finance team to manage digital assets, achieving 98% utilization of stakeable assets for revenue generation and over \$50M in tax savings, as well as develop and maintain internal tools to empower the finance team, resulting in a 2000% increase in transaction generation velocity.

Coral - *Co-Founder & Lead Engineer*, Remote

September 2021 - February 2023

- Led the engineering team in front-end, back-end, and smart contract development for a digital asset marketplace for music, collectibles, events, and experiences, as well as a crypto-based affiliate/referral marketing platform on the Avalanche C-Chain, which secured \$500K in seed investment from Avalaunch, Status, and Wave Financial.
- Worked cross-functionally with co-founders to translate business requirements into product specifications and engineering tasks, managed third-party design services for UI/UX, and coordinated project schedules, task assignments, and progress tracking to meet deliverable timelines
- Architected and implemented features such as low-friction social login sign-ups with non-custodial wallet creation, resulting in 83% of users signing up with social accounts, and NFT minting with credit cards via Stripe, leading to 91% of users purchasing NFTs with credit cards.

User1st - *Solutions Architect - R&D*, Remote

January 2020 - February 2023

- Led the development of in-code accessibility libraries for 8 NPM packages, including a core accessibility remediation library, web framework-specific packages for Vanilla JS, React, Angular, and Vue, and a micro-frontend-based static accessibility analysis toolbar using web components and Shadow DOM.
- Managed and automated versioning and publishing of NPM packages using TurboRepo and Lerna, reducing package deployments by 75%, as well as developed JWT-based read/write access middleware for a private NPM registry using Verdaccio.
- Modernized development and build tooling, and parallelized processes across codebases, reducing development environment startup times by 95%, build times by 80%, and engineering onboarding time by 90% using TurboRepo, PNPM, Vite, Rollup, and ESBUILD.

---

## Skills

---

Languages:  
HTML, CSS, TypeScript, JavaScript, Shell

Front End Technologies & Tools:  
Figma, React, React Native, Next.js, Redux, RxJS, Storybook

Development & Testing Tools  
Git, NPM, Yarn, PNPM, Vitest, Webpack, Rollup, Vite, Lerna, Turborepo, Github Actions

Back End & Infrastructure Technologies:  
Node.js, Docker, Kubernetes, PostgreSQL, Cloudflare, AWS

---

## Education

---

The University of Virginia: School of Engineering and Applied Science (SEAS)

August 2016

- B.S. Computer Engineering & B.S. Electrical Engineering
