## Profile

---

I am a Software Engineer with a passion for technology and creating software that positively impact people and society. My areas of professional interest include the Web, distributed systems and engineering leadership. I offer over three years of professional experience in software development using the JavaScript ecosystem, functional programming paradigms and event-driven architectures in Agile environments, including over one year of professional experience in web & mobile accessibility and remote work experience in cross functional teams across international time zones.

---

## Work Experience

---

*User1st - Software Engineer, Remote* February 2021 - Present

- Resolve critical customer issues for Check1st, an automated web accessibility assessment SaaS platform, including chart layout & responsivity, date formatting, and time localization issues.
- Coordinate directly with two enterprise stakeholders to analyze requirements and communicate customer feature requests and issues to product owner.
- Lead instruction for accessibility training with 20+ hours of instruction time covering a range of topics including accessibility standards & principles, assistive technologies and best practices for developing and testing accessible software.
- Provide technical support to enterprise customers, including a major wireless network operator and a domestic passenger rail road service, as well as engineering support to sales.

*User1st - Solutions Integrator, Washington, D.C./Remote* January 2020 - February 2021

- Remediated websites to comply with accessibility standards using User1st's uRemediate™ platform for 20+ clients, including a major wireless network operator and a Fortune 500 healthcare provider.
  - Audited client websites and mobile applications for compliance with the WCAG 2.1 AA standard and Section 508 guidelines and American's with Disabilities Act (ADA).
  - Created internal tooling to automate tasks & improve productivity including:
    - A command-line tool built with Node.js & Puppeteer to automate website URL discovery and auto-generate web page screenshots to reduce time estimations by 33% and improve accuracy by 50% for client websites.
    - A cross-browser extension built with the WebExtension browser API to inject runtime environment for client sites without the neccessary uRemediate™ snippet installed to replace unreliable tooling in 95% of use cases.
- 

## Skills

---

### Languages:

JavaScript, TypeScript, Shell (Bash)

### Design, Front End & Accessibility Technologies:

Figma, Sketch, HTML, CSS, React, Slack Block Kit, JAWS, NVDA, VoiceOver (iOS), TalkBack (Android), WCAG 2.1/WAI-ARIA

### Development and Testing Tools:

Git, NPM, Yarn, Webpack, Babel, Jest, ESLint

### Back End & Infrastructure Technologies:

Node.js, Express, Slack Admin API/Bolt SDK, PostgreSQL, CircleCI, Docker, Kubernetes, AWS

---

## Education

---

The University of Virginia: School of Engineering and Applied Science (SEAS)

August 2016

- B.S. Computer Engineering & B.S. Electrical Engineering
