Profile

I am a Software Engineer with a passion for creating products that empower people and democratize technology. I believe in the power of leveraging compassionate and data-informed design based on first-principles to drive product and engineering practices. I offer over 3 years of professional experience in software development using functional programming/object-oriented paradigms and event-driven architectures in Agile environments. My expertise is in front-end, UX/UI, and digital accessibility, and my areas of professional interest include the Web, software architecture, and engineering productivity/leadership.

Work Experience

User1st - *Software Engineer - R&D*, Remote
February 2021 - Present

- Conduct research and implement proof-of-concept for microfrontend architecture using shadow DOM and React higher-order component library for automatic accessibility remediation for new accessibility product suite.
- Develop automated accessibility fixes, bootstrap linting and Webpack infrastructure, and implement decorator library for cross-cutting concerns in TypeScript for accessibility remediation SaaS platform.
- Resolve critical customer UI issues for an automated web accessibility testing SaaS platform developed with React that led to the retention of a multi-million dollar enterprise client.
- Lead instruction for accessibility training with 20+ hours of content covering a range of topics including accessibility guidelines, assistive technologies and best practices for developing and testing accessible software.
- Perform manual accessibility testing, provide on-call engineering support for U.S. customers, and engage directly with enterprise clients to advise on workflow and infrastructure integration with User1st products.

User1st - *Solutions Integrator*, Washington, D.C./Remote
January 2020 - February 2021

- Remediated websites to comply with accessibility standards for 20+ clients, including a major wireless network operator and a Fortune 500 healthcare provider.
- Audited client websites and mobile applications for compliance with the WCAG 2.1 AA standard, Section 508 guidelines, and the ADA with assistive technologies such as JAWS, NVDA, VoiceOver and Talkback.
- Created internal tooling to automate tasks & improve productivity including:
  - A command-line tool to automate website URL discovery and auto-generate web page screenshots to reduce time estimations by 33% and improve accuracy by 50% for client websites.
  - A cross-browser extension to inject User1st's uRemediate runtime environment for client sites during accessibility remediation to replace unreliable tooling in 95% of use cases.

Skills

Languages:
JavaScript, TypeScript, Shell (Bash)

Development and Testing Tools:
Git, NPM, Yarn, Webpack, Babel, Mocha, Chai, Puppeteer, ESlint

Front End Technologies:
HTML, CSS, React, Redux, Emotion, Storybook

Back End & Infrastructure Technologies:
Node.js, Express, PostgreSQL, Docker, Kubernetes, AWS

Education

The University of Virginia: School of Engineering and Applied Science (SEAS)
August 2016

- B.S. Computer Engineering & B.S. Electrical Engineering
